

AUTOGUARD™ ENGINE STOP LEAK

AUTOGUARD ENGINE STOP LEAK is a specially formulated oil additive designed to reduce or eliminate oil leaks from old worn out seals and gaskets that have shrunk due to temperature or wear. Elastomeric seals contacted by hot oil tend to shrink, harden and become less pliable; as a result, oil begins leaking out. **AUTOGUARD ENGINE STOP LEAK** contains a synthetic seal swell additive to swell seals back to their original size and helps them regain pliability. This product contains no solids that can plug oil filters and small engine oil passage ways.

Benefits

- Compatible With All Motor Oils
- Reduces Oil Leaks from Seals and Gaskets
- Keeps Seals and Gaskets Soft and Pliable
