

AUTOGUARD™ DE-ICER

AUTOGUARD DE-ICER – is used to remove frost or ice from windshields. **AUTOGUARD DE-ICER** is an aerosol. Its active ingredients are methanol, ethylene glycol, other alcohols, and water. When the DE-ICER is sprayed on, the methanol soaks into the frozen material and rapidly lowers its melting point. This allows the ice to become a soft, slush-like mixture even at below-freezing temperatures. This mixture can be removed with windshield wipers or a windshield cleaning tool. If **AUTOGUARD DE-ICER** is applied in advance, it will retard ice formation and fogging on inside of windows.

Benefits

- Removes Frost and Ice From Windshields, Locks and Mirrors
- Will Not Harm Rubber, Metal, or Paint Finishes
- Retards Ice Formation
- Contains No CFC's

Typical Characteristics

Contains	Methanol, Ethylene Glycol
Propellant	A60 (Propane/Butane Mixture)
Flash Point, TCC	52°F

WARNING: Read label directions and warnings completely.
